Welcome to Froggy's Fog

Our Brand Story

For more than 20 years, Froggy's Fog LLC has been the most trusted theatrical fluids manufacturer in the U.S. The Froggy's Fog product line includes a fluid for every effect, ranging from fogs to hazes (yes, there is a difference!) and even artificial snows. Froggy's Fog services the needs of the entertainment industry and significant production companies around the globe by providing high-quality machines designed to bring your special effects visions to reality. Special effects machines range in quality and price that are attractive to the individual user to professional-grade machines manufactured with German engineering and durability at the forefront of their design.

Froggy's Fog also produces the Firebase® Smoke Generators and Training Smoke® Fluids that service major government agencies. These agencies rely on the professional quality of our machines, the safety and effectiveness of fluids during training, and the customer service provided to ensure you are always pleased with your products. To back this up, Froggy's Fog guarantees most of its product line with an industry-leading two-year warranty. Most notably, the portfolio has expanded to include "Fobbles®" fog-filled bubble machines and "Poseidon®," a proprietary low-lying fog machine that doesn't require ice or chilling. These machines have won numerous awards for design and innovation.

Machine Spotlight
TITAN[®]
1500 PRO

FEATURES

Quick-Ready Fog

In professional applications, speed is essential and every second of downtime counts. Each machine in our Titan® series features an oversized heater core and intelligent reheating, allowing for less than 10 seconds between bursts, even at full output.

Ruggedized Machine

The 1500 PRO excels in outdoor environments. The machine features robust weatherproofing on essential components, ensuring reliable performance in less-than-ideal conditions. The sturdy, ruggedized exterior can hold up to the wear-and-tear associated with a long and successful season of use.

Incredible Output

Each of the Titan® machines features incredible output levels. The 1500 PRO boasts 30,000 cubic feet per minute of output; more than enough to quickly fill any venue. Accurate, 0-100% output control allows you to use as much or as little of that power as you would like.

Fog Machines

Titan® fog machines provide fantastic performance at every price point. From the simple yet powerful 1200 to the feature-loaded 1800 Pro, each of these machines has the reliability and the output you need for your productions.

A1 THANOS
HANDHELD FOG GUN

FEATURES

Battery Power

The AI THANOS is fully electric and has a long, 30-second fog output. The rechargeable battery inside the gun makes it freely portable without the restriction of a bulky power cord. Output strength and speed are enhanced by an axial booster jet.

Custom Output Options

Various settings are made via the display menu. Here you can change the strength of the fog output, the LED color at the outlet nozzle (to color the fog), as well as the LED color of the case lighting.

Included Items Specifications

- AI Thanos Fog Gun
- 2 Batteries
- Premium Transport Case
- 2 Fluid Tanks
- Carrying Strap
- Charging Base (110V or 220V)

- 7 Min. Heat Up Time
- 330 mL Fluid Capacity
- 20,000 CFM
- 8 Meter Output Distance
- 30 Second Max Output Burst
- Onboard LCD Menu System

Machine Spotlight

HYPERION[®] TJ10

FEATURES

Impressive Output

The Hyperion® TJ10 is capable of producing monumental columns of fog up to 50 feet high at a rate of 117,000 cubic feet per minute. 0-100% Output control gives you total control over these powerful, high density effects.

Instant Stop Tech

Upshot effects depend on precision to create maximum impact. Our instant stop technology reverses the flow of fog fluid after a burst to instantly cease fog production and aid in preserving heater core life.

RGBAW+UV LEDs

Any color imaginable is possible with the integrated LEDs. The Hyperion's two-zone lighting allows for inner and outer column effects for an infinite number of color combinations, including UV effects.

Upshot Fog Machines

Hyperion® Upshot Fog Machines give you 30-40' plumes of fog on command via DMX or timer control. Our unique, 2-zone LED lighting gives you countless color options for the plume and is capable of simulating flame effects without the heat or risk.

HYPERION® D4

Machine Spotlight
POSEIDON[®]
ULTRASONIC LOW FOGGER

FEATURES

Ultrasonic Technology

Creating monumental clouds of ground fog requires only two consumables when using the Poseidon® - water and fog fluid. By merging the particulates of both forms of vapor, the machine is able to produce an incredible low-lying effect without the need for ice, dry ice, or CO2. This leads to an effect that is not only more efficient, but much safer as well.

Intuitive Controls

Adjustable fan speed, output, and 3-stage humidity settings can all be adjusted in real time from the LCD menu on the machine. Altering DMX address and timer settings is incredibly easy using the simple menu system.

Continuous Output

Run the show as long as you need. The Poseidon® series has plenty of power to keep the heater core up to temperature for hours at a time and the auto-refill water system makes this a low-maintenance machine.

Ground Fog Machines

Better effects with fewer inputs. That's what the Titan® Ice and Poseidon® series do best. Using ultrasonic technology, the Poseidon machines create billowing ground fog using only water and fog fluid. If a fog chiller system with premium functionality is what you're after, look no farther than the Titan Ice.

TITAN® ICE

- 20 LBS Ice Capacity
- 0-100% Output

POSEIDON
AQUA FLAME®

POSEIDON **AQUA FLAME**®

FEATURES

The Poseidon® Aqua Flame® is an event-ready, simulated flame machine that creates a wall of harmless and realistic looking flames using only water. IP55 level components allow for outdoor use. 64 LEDs give realistic illumination to simulate a wall of flame while generating harmless water vapor. Available in AF1 (Single Color) and AF6 (Multi-Color) configurations.

The chassis features high-strength composite material for durable and rust-free operation. The automatic refill function can be used with a garden hose or the unit can be filled manually with the onboard water storage tank.

SPECS:

- 3 Second Ready Time
- 210 Min. Output on Max
- 4 Channel DMX Control
- 4 Gallon Water Capacity
- Onboard LCD Menu System

INCLUDED ITEMS:

- Aqua Flame Machine
- Manual
- IP65 Power Cable

Machine Spotlight
TITAN®
HAZE MACHINES

FEATURES

Excellent Consistency

The H4 produces incredible amounts of haze in a very short time period, making it easy to quickly fill a venue with atmosphere. This function doesn't come at the expense of form; the haze produced from this touring-quality machine contains fine particles that form a consistent canvas for lighting and effects.

Wireless Functionality

The Titan® H4 includes a wireless on/off remote to make pre-event setup a breeze. With near-instant ready times, you can begin adding atmosphere to your venue with the press of a button.

Simple Controls

Controlling the H4 is simple via the LCD menu. Quickly adjust DMX profiles, set timer intervals, and control your output settings. If analog controls are more your style, two dials on the front of the machine allow you to manually set output and fan speed.

Haze Machines

Titan® haze machines are designed to give you complete control of your atmospheric effects. Each model offers multiple control options, allowing for seamless integration with your existing lighting design. Precise output and fan control creates an ultra-fine atmosphere of haze that will make your lights look amazing.

TITAN® H2

FOG FLUIDS

At Froggy's Fog, we offer a fluid for every effect! From extreme density and ultra-long hangtimes to fast dissipating, low-density effects, we have a fluid for just about any application. Each of our fluids is manufactured right here in the USA using only the highest quality, pharmaceutical-grade ingredients and UV-Filtered, De-ionized water.

BOG FOG®

DENSITY: EXTREME

HANG TIME: 1+ Hour

Bog Fog offers maximum density with a great hang time. It has been designed to create low-to-no visibility effects.

QUIK BLAST®

DENSITY: EXTREME

HANG TIME: 30 Sec. - 1 Min.

Quik Blast offers extreme density without the hang time. Perfect for simulating CO2 burst effects in a completely safe manner.

BACKWOOD BAY®

DENSITY: HIGH

HANG TIME: 1+ Hour

Backwood Bay is a fantastic outdoor fluid. It offers a high density fog that lasts for more than an hour without compromising visibility.

SWAMP JUICE®

DENSITY: HIGH

HANG TIME: 2+ Hours

Swamp Juice is our longest lasting fluid, providing 2 or more hours of hang time and high density. Perfect for outdoor attractions.

FOG FLUIDS

VELOCITY®

DENSITY: MEDIUM

HANG TIME: 1-2 Min.

Velocity is the perfect fluid for adding atmosphere to film and photography projects. A medium density effect with short hang time.

TECHNO FOG®

DENSITY: MEDIUM

HANG TIME: 30 Min.

Techno Fog creates an effect similar to haze from a conventional fog machine. Designed to enhance lighting effects.

CRYOFREEZE®

DENSITY: EXTREME

HANG TIME: 30 Sec. - 1 Min.

Cryofreeze creates amazing, low-lying fog effects when paired with a chiller. Designed for indoor applications.

FREEZIN' FOG®

DENSITY: EXTREME

HANG TIME: 30 Min.

Freezin' Fog creates amazing, low-lying fog effects when paired with a chiller. Perfect for all outdoor applications.

HAZE FLUIDS

Offered in both water-based and oil-based formulas, Froggy's haze fluids are able to provide exceptional lighting enhancement for your event. Designed to create the most consistent particulates possible, these fluids produce an atmospheric canvas that is incredibly uniform. Each of our fluids is manufactured in the USA using only the highest quality ingredients, making them the ideal choice for an odor-free, irritation-free haze.

FAZE HAZE

OPTIMIZED FOR:

Antari, Martin, Hazebase and Look Solutions

Faze Haze is a premium fluid that is compatible with almost all water based hazers. Amazing consistency and efficiency.

NEUTRONIC®

OPTIMIZED FOR:

Le Maitre and Ultratec Hazers

Neutronic is an economical alternative to more expensive fluids. It is a high-performance fluid that will help you get the most from your machine.

PERFORMANCE HAZE

OPTIMIZED FOR:

ETC Connect HQ-100 Hazers

High Performance Haze is formulated to produce a beautiful, translucent canvas of haze with a long hang time.

BEAM SPLITTER

OPTIMIZED FOR:

Chauvet, ADJ, and all water based hazers.

When designing stunning lighting effects, it's important to have a quality canvas. Beam Splitter is designed with lighting in mind with a consistent, dry haze that reflects light beautifully.

OIL-BASED HAZE

DaFiddy

OPTIMIZED FOR:
DF-50 Hazers

Designed to perform flawlessly in DF-50 haze machines. Oil-less and oil-based available.

Houston Haze

OPTIMIZED FOR:
All Oil-Based Hazers

Designed for compatibility with both heat and compression-based haze machines.

BUBBLE FLUIDS

Bring joy and excitement to your next event with colorful, abundant bubbles. Froggy's offers four main formulas of bubble fluid, each with a specific use in mind. Like all of our formulas, these fluids consist of only the highest quality ingredients for safe, amazing special effects.

HIGH COLOR

OPTIMIZED FOR:

Vibrant Color

High Color Bubbles feature a strong outer shell that reflects a rainbow of color and light. Great for outdoor events and bubble machine use.

PRO BUBBLE

OPTIMIZED FOR:

Maximum Strength

These bubbles feature an ultra-high surface tension to allow them to be used successfully in all types of professional bubble machines.

MAX BUBBLE

OPTIMIZED FOR:

High Bubble Quantity

Our Max Bubble formula is designed to produce large volumes of smaller bubbles. Perfect for weddings, parties, and concerts.

BIG BUBBLE

OPTIMIZED FOR:

Maximum Bubble Size

The Big Bubble formula was created to provide the largest bubbles possible. Great for giant bubble wands and large bubble machines.

Machine Spotlight

BOREAS[®]
MBIP

FEATURES

Weatherproof Design

The M6IP features IP Rated DMX connectors, power control switch, power connectors as well as blower fans to facilitate extended outdoor use. Backlit LCD display with magnetic sun cover offers easy machine adjustment plus UV protection of the panel.

Convenient Controls

Control the Boreas® M6IP however you choose via 3 channels of DMX and RDM support. A Wireless Control Transmitter is also included to provide additional control over fan and fluid pump settings.

Fully Adjustable Output

Using the included remote or DMX control, fluid output can be precisely adjusted to create a wide range of snow effects. Particle size can range anywhere from the finest flurries to full blizzard effects. A variable blower fan allows for quieter operation when necessary.

- IP54 Blower Motor

Snow Fluids

Froggy's Fog provides a snow fluid for every type of application. Whether indoor or outdoor, long-lasting or fast-drying, we offer a perfect machine and fluid combination for your event.

The float distances and evaporation speeds here are based on consistent, wind-free conditions. Snow is impacted greatly by environmental factors such as wind and humidity.

Fluids with a higher water content, such as Long Lasting and Dry, will tend to form heavier flakes that stick around longer.

Fluids like Extra Dry and Ultra Dry will form lighter particles that may see increased lateral movement in the wind, but will evaporate before reaching the ground in many applications.

Laser Swamp

By far one of our most popular effects; the Laser Swamp® by Froggy's Fog has been wowing spectators at professional haunts around the globe.

The Laser Swamp® creates the illusion of wading through Green water with the help of Haze and Lasers. The opaque layer of light is nearly impossible to see through, making it the perfect way to hide actors and props. When mounted from an elevated location, these lasers can also produce a liquid sky effect!

Froggy's Fragrances

Scents are a great addition to any attraction. Create an immersive customer experience by choosing the perfect scents for the occasion. Froggy's Fog offers a huge variety of smells ranging from pungent to pleasant and everything in between. These fragrances are offered in 3 different formats:

Fluid Additive

Compatible with fog, haze, snow, or bubble fluid. Simply add 0.5 oz to a gallon of fluid and mix to distribute scent via your special effect of choice.

Distro Refills

An incredibly efficient option designed for use in our scent distribution machines. Distro Refill scents can also be used to refill scent cup systems.

Spray

No equipment, no problem! Take your favorite scents anywhere with sprays. Apply to scenes, actors, or simply use as a room spray.

SCENT BOX/CUPS

For budget-friendly continual scenting, use one of our convenient scent boxes! These battery powered units use our scent cups.

MICROFOGGER PRO 5

INSTANT FOG IN THE PALM OF YOUR HAND

FEATURES

Featuring a completely redesigned layout and new smoke generation technology, this is by far the most reliable (and leak-proof) smoke machine on the market, providing you with limitless use for years to come. The new hot-swappable fluid tank assembly and replaceable battery mean that you can use it all day, with virtually no downtime.

The 5 Pro generates enough smoke to fill an average living room with a safe, odorless smoke in about 1-2 minutes, and doesn't need any heat up time. The MicroFogger 5 Pro can be remote controlled using the included keyfob from up to 30m away, for easier solo photography. When the battery runs out, simply re-charge it using the USB-C cable or replace it with a spare one.

- Onboard screen for ease of use
- Simple 3 button operation
- 30 min continuous use equivalent battery life
- 8 adjustable smoke speed and density levels
- Optional wired remote capability
- Integrated remote control receiver
- 4 Selectable remote control channels
- Programmable timed delay mode
- Programmable continuous operation
- Programmable loop mode setting

Private Branding

At Froggy's Fog, we understand the value of a distinct brand identity. That's why we offer the opportunity to take our nationally recognized special effects fluids and make them uniquely yours.

Froggy's Fog fluids are available in private labels that showcase your brand's identity while ensuring the highest quality and performance. All private label products use the same pharmaceutical-grade ingredients that comprise our well renowned fog, haze, snow, and bubble juices.

We offer low minimum order quantities, making it easy for you to customize your own branded fluids without the burden of excessive inventory commitments.

Whether you're looking to enhance your product line or create memorable experiences for your customers, Froggy's Fog is here to help you make your mark. Elevate your brand and set yourself apart in the industry with private-labeled fluids from the award-winning industry leader, Froggy's Fog.

YEARS

EST. 2005

The last two decades have been a blast, and it's all thanks to our amazing Froggy's Fog customers! We're looking forward to the future and seeing all the awesome experiences and attractions that you'll create. As always, our team is eager to help bring your vision to life and help you get the most out of your special effects machines and fluids.
